

SHARANABASAVA

Java Full Stack Developer

sharanurs05@gmail.com | [+91 8310523509](tel:+918310523509) | Bengaluru, India | <https://www.linkedin.com/in/sharanabasava-797746280> | [sharanabasava83](#)

CAREER OBJECTIVE

Highly motivated Computer Science Engineering graduate with a strong academic background, internship experience, and hands-on software development projects. Seeking an entry-level Software Engineer or Java Full Stack Developer role where I can contribute to building innovative, reliable, and scalable software solutions while continuously learning, growing, and creating value for the organization.

EDUCATION

Bachelor of Engineering in Computer Science — Government Engineering College, Huvina Hadagali

CGPA: 9.02/10.0 | Graduated: MAY 2026

TECHNICAL SKILLS

Languages: Core Java, C, SQL, Advanced Java

Backend: Spring Boot, REST API, JPA/Hibernate, Node.js, Express.js

Frontend: React, HTML, CSS, JavaScript

Databases: MySQL, SQL, SQLite, H2, Query Optimization

Testing & QA: TestNG, JUnit, Postman, Manual & API Testing

Tools & DevOps: Git, GitHub, Maven, Jenkins, Docker, CI/CD

Concepts: OOP, Data Structures & Algorithms, Collections, Exception Handling, JDBC, Multithreading, DBMS, SDLC

INTERNSHIP EXPERIENCE

Java Full Stack Developer Intern — Pentagon Space Pvt. Ltd. (Jan 2026 – Jun 2026 | Bengaluru, India)

- Assisted in developing RESTful APIs using Spring Boot and Java for modules covering user authentication, product management, and order processing.
- Worked on the MySQL database layer, including schema design, CRUD operations, and query tuning, under the guidance of senior developers.
- Tested API endpoints using Postman to identify and report bugs, contributing to a reduction in defects before release.

Java Developer Intern — Overload Ware Labs AI (OWL AI) (Feb 2026 – Mar 2026 | Remote)

- Contributed to building application modules using Spring Boot and MySQL during a 1-month remote internship.
- Practiced structured debugging and applied OOP principles to resolve business logic issues, and supported deployment of modules to the Render cloud platform.

ACADEMIC & PERSONAL PROJECTS

Global AI Surgical Copilot Ecosystem - Java · Spring Boot · React · MySQL · Docker · REST API

- Built a Spring Boot backend with multiple modules, integrating an AI chatbot, vitals monitoring, and a 3D organ viewer as part of a learning-focused prototype.
- Containerized the backend with Docker and deployed the frontend and backend separately on Render.

Live: <https://surgical-copilot-frontend.onrender.com> | GitHub: <https://github.com/sharanabasava83/Surgical-copilot-AI>

Glass Co Website - Node.js · Express.js · SQLite · HTML · CSS · JavaScript · Render

- Designed and built a full-stack business website from scratch, covering frontend, backend, and database, without using templates.
- Implemented a REST backend with SQLite to manage customer inquiries and deployed it live on Render via GitHub.

Live: <https://glassco-website.onrender.com> | GitHub: <https://github.com/sharanabasava83/glassco-website>

Orbital Traffic Control — Space Traffic Dashboard - Java 17 · Spring Boot 3 · WebSocket · Three.js · Docker · Maven · Render

- Built a space traffic tracking dashboard using Keplerian orbital mechanics concepts, with WebSocket for live telemetry updates.
- Deployed the project on Render with REST API integration and basic collision-alert visualization.

AI-Powered Infant Brain Tumor Classifier - Python · TensorFlow · Pytorch · CNN · ResNet · Flask · Docker · AWS EC2 · React

- Trained a CNN model on a public infant brain MRI dataset using TensorFlow/PyTorch with transfer learning (ResNet/EfficientNet) as an academic machine learning project.
- Exposed the trained model as a REST API using Flask and containerized it with Docker for demonstration purposes.
